

Performance made simple. Powerful. Durable. Functional.

ASTRO® XTL™ 1500 Digital Mobile Radio

Meet the digital workhorse for your mobile needs.

ASTRO® XTL™ 1500 Digital Mobile Radio

Imagine a digital radio that stands up to the toughest demands, yet is easy for your personnel to use. A powerful mobile that combines leading edge technology, world class quality and robust reliability.

Motorola delivers it – an affordable digital radio powerful in performance and rich in features. Whether you have digital or analog communications, the ASTRO XTL 1500 mobile radio is the cost-effective way to expand your system and gain Project 25 interoperability.

Easy to use. Tough to beat.

The XTL 1500 mobile radio is designed with your users in mind. In any mobile radio environment, its high quality transceiver withstands the most demanding conditions. Resisting dust, blowing rain, vibration, shock and many of the other inevitable circumstances your users will face during their day-to-day responsibilities.

XTL 1500: THE POWERFUL, AFFORDABLE MOBILE

- Dual mode operation: digital and analog
- Resourceful entry into P25 interoperability
- Durable, robust, road-tested
- High quality two-way technology
- Simple programming; customize or enhance
- FLASHport™ capability
- Optimal audio clarity
- Software enhancement package
 - 255 channels
 - ADP
 - IV&D capability

The XTL 1500 mobile radio was designed to be user-friendly, with a simple interface that minimizes training. An 8-digit alphanumeric display, status icons, programmable buttons and larger-sized knobs streamline operation.

Enhanced audio. Richer features.

Audio improvements have been designed into the XTL 1500 mobile radio to provide enhanced sound quality for demanding environments. In addition to supporting an external speaker, the internal speaker assures optimal audio for clear, crisp communication.

With 48 channels, dual modes (analog and digital), P25-compliant interoperability features, emergency capabilities and more, the XTL 1500 mobile radio links your force together, helping to enhance productivity and ensuring reliable communications.

Program easily. Upgrade simply.

When it comes to programming, the XTL 1500 mobile radio can easily be programmed via the front of the radio using the same Customer Programming Software (CPS) as the XTL 2500 and XTL 5000 mobile radios. This easy to use, Windows-based customer programming software allows programmers to utilize the drag and drop, clone wizard, and programming over IP

capabilities. As your system changes or expands, migrate effortlessly. You can customize, add new software or future enhancements as your needs grow. Not only is the XTL 1500 mobile radio compatible with trunking digital, trunking analog and digital conventional, it is your affordable entry into P25 interoperability.

Superb engineering. Signature quality.

Gain peace of mind knowing your radio will work how you want it to and when you need it. Every XTL 1500 mobile radio is backed by our renowned expertise and quality. Get leading technology you can rely on, wherever you go.

Communicate better with the XTL 1500 digital mobile radio
